

ENVIRONMENTAL POLICY

of the Aliplast Group, i.e.

Aliplast sp. z o.o.

Aliplast Extrusion sp. z o.o.

We recognise that environmental degradation and climate change are serious global issues. As a company, we feel obligated to minimise our impact on the environment and climate. We believe that our corporate responsibility goes beyond ownership. We can ensure that our all activities comply with environmental laws and regulations. We also strive to go beyond standards and regulations applicable to all to make the best possible contribution to the protection of the Earth's natural resources.

We are aware of this responsibility and we commit ourselves to:

- comply with applicable laws and other environmental guidelines and standards,
- improve our skills, access to information and awareness of our employees in terms of improving environmental aspects and waste management,
- implement new technologies and available solutions to decarbonise the manufacturing process,
- strive for climate neutrality by reducing the carbon footprint of our operations.

We fulfill the above-mentioned obligations by:

- continuous improvement of the Integrated Management System (IMS), in accordance with the requirements of PN-EN ISO 14001:2015,
- conducting rational policy in the field of environmental protection, sustainable use of resources, pro-environmental waste management and pollution prevention,
- systematic training of employees,
- continuous investment in more and more modern equipment, with a focus on energy efficiency and other environmental factors,
- systematic oversight of environmental legal requirements and other company regulations and requirements,
- elimination of the risk of environmental accidents by continuous monitoring of machinery, equipment and installations,
- selection of business partners focused on environmental aspects.

Jan Kidaj

President of ALIPLAST Group
